

Local Government Audit Committee Briefing

EY

Building a better
working world

Contents at a glance

This sector briefing is one of the ways that we support you and your organisation in an environment that is constantly changing and evolving.

It covers issues which may have an impact on your organisation, the Local Government sector, and the audits that we undertake.

The briefings are produced by our public sector audit specialists within EY's national Government and Public Sector (GPS) team, using our public sector knowledge, and EY's wider expertise across UK and international business.

The briefings bring together not only technical issues relevant to the Local Government sector but wider matters of potential interest to you and your organisation.

Links to where you can find out more on any of the articles featured can be found at the end of the briefing.

We hope that you find the briefing informative and should this raise any issues that you would like to discuss further, please contact your local audit team.

Government and economic news

Will the UK economy hold up as Brexit nears?

The latest forecast from the EY Item Club highlights that UK GDP growth in 2017 was 1.8%, which was better than expected. However, it does compare unfavourably with 2017 GDP growth of 2.5% for the Eurozone, 2.3% for the US and an estimated 3.0% globally.

The momentum from 2017, an improving outlook for consumer spending, and the increased likelihood of a near-term Brexit transition arrangements are expected to support UK growth this year. With this, we have nudged up our UK GDP forecast for 2018 to 1.7%, up from the 1.4% we predicted in our Autumn forecast in October last year.

However, further out, the UK's limited productivity performance and ongoing Brexit and political uncertainties will see the UK achieve only mid-range growth. With this, we have slightly reduced our GDP growth projections for 2019 to 1.7% (down from 1.8%), 1.9% for 2020 (down from 2.0%), and 2.0% for 2021 (down from 2.2%). Although we have modestly downgraded our expectation of the UK's productivity performance, it remains more optimistic than the Office for Budget Responsibility's latest forecast. Specifically, we forecast output per hour to rise 0.9% in 2018 and then 1.3% annually during 2019-2021.

Much depends on how the Brexit negotiations develop.

The expectation is that the UK and EU will make sufficient progress to agree a transition arrangement lasting at least two years, from late March 2019. Since this will have to be ratified across the EU, agreement essentially needs to be reached by October 2018. Progress towards a transition deal in late 2018 should support business confidence and a gradual pick-up in investment, helping GDP growth accelerate.

Provisional 2018-19 Local Government Finance Settlement

On 19th December 2017 the Government set out the provisional funding plan for the 2018-19 financial year, which will be the third year of the four year multi-year settlement that was accepted by 97% of local authorities. The main themes of the provisional settlement were:

Council tax referendum principles – as a result of the financial settlement consultation process the government has decided to set the core referendum principle at 3% in 2018-19 and 2019-20, to match the higher than expected inflation. This change will give local authorities more flexibility in deciding how money will be raised to offset the increasing financial pressures and demand on services. Shire district councils will be allowed an increase of 3% or £5 whichever is higher.

Continuation of the adult social care precept principle of a 2% increase, with the additional flexibility in 2018-19 to increase the precept by an additional 1%, from 2% to 3%, provided that the total increase across the three years 2017-18 to 2019-20 does not exceed 6%.

Analysis by the Local Government Association has estimated that the impact of increased flexibility in council tax precepts could be worth up to £540mn to local authorities by 2019-20. However local services are facing a total funding gap of £5.8bn in 2019-20. Therefore, the increased powers to raise council tax are not sufficient to meet the future funding gap.

Business rate retention – the Government's continued intention to reform local government financing in the future by allowing authorities to retain a greater percentage of business rates instead of receiving certain grants (including RSG, public health grant) direct from central government. By 2020-21 it is estimated that the business rate retention across the local government system would be 75%, compared to the current level of 50% retention. It was also announced that the 100% business rates retention pilot schemes were going to be expanded to include a further 10 local authorities.

New homes bonus – since inception the new home bonus has allocated £7bn to local authorities to encourage the building of over 1.2 million new homes. The Government has decided to continue to set the national baseline (below which no bonus will be paid) at 0.4% for 2018/19. The national baseline represents the annual growth of Band D properties within a local authority above which the new homes bonus will be awarded. Government retained the option to adjust the baseline in future years based on housing statistics as reported through council tax base figures. This stability will provide some security for district authorities who have based their growth strategy on the New Homes Bonus.

Carillion liquidation

Major public sector building and support services contractor Carillion plc went into compulsory liquidation on 15 January 2018. Carillion's sudden collapse is being felt across the country as a range of public services, from road building to school meals, have been unexpectedly terminated in a number of local authorities.

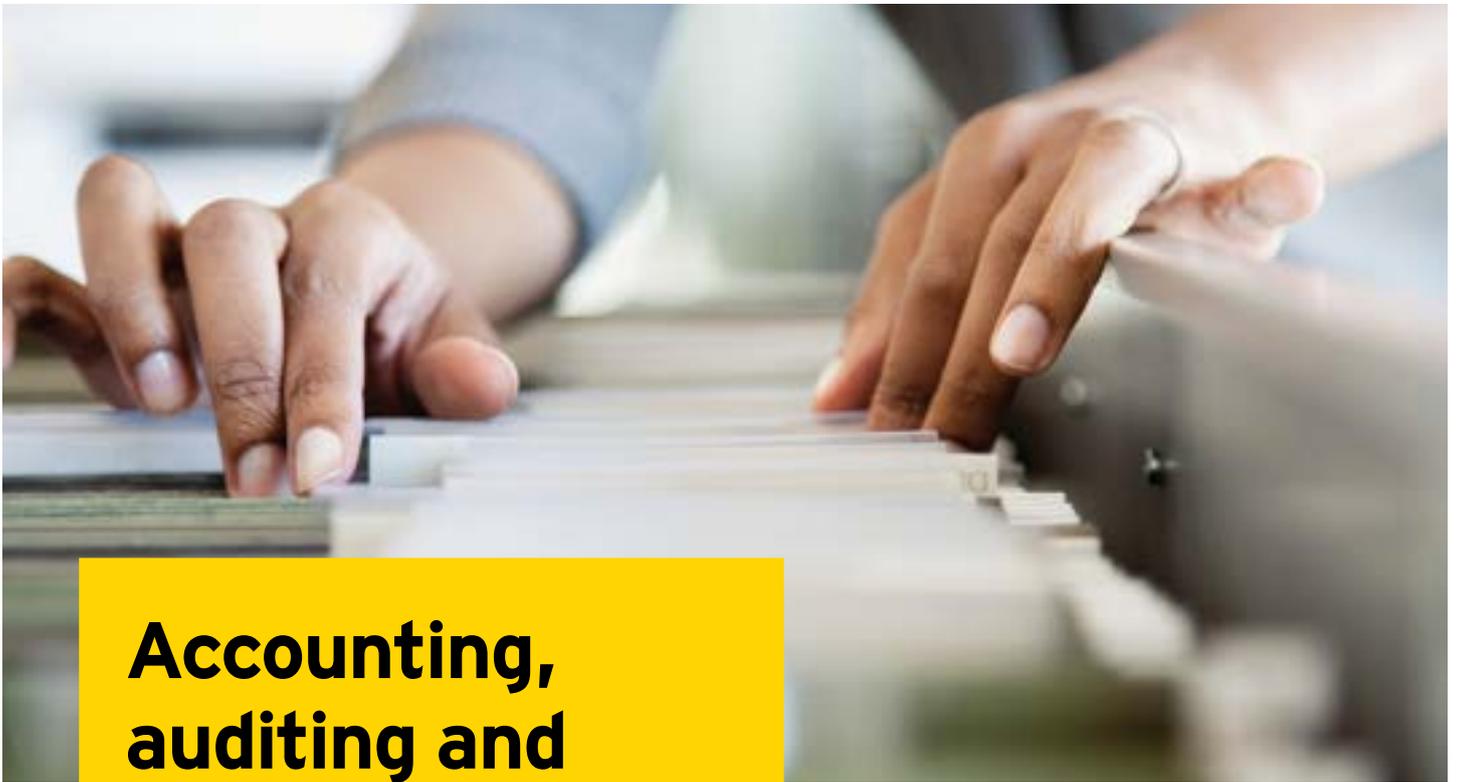

The full extent of the affected services is yet to be determined as local authorities discuss existing contracts with the Official Receiver. Local authorities are implementing contingency plans where possible, including either finding alternative contractors or taking services back in house. For example the response from Oxfordshire County Council in relation to the provision of school meals at 90 schools supplied by Carillion was to guarantee Carillion staff who worked in schools that the county council would ensure that they were paid.

Although the Government has pledged that public services 'will be protected' after Carillion's collapse, it is unclear how or when funding from central Government will be made available to the affected local authorities.

Public sector pay

Since 2013, the Government has implemented a policy of a 1% annual pay increase cap for public sector workers; which was estimated to have saved approximately £5bn by 2019-20. In the Autumn Budget 2017 the Government confirmed the end of the 1% pay increase policy. Therefore from 2018-19, pay review bodies will be able to award pay increases of greater than 1% as they determine to be appropriate. After the long freeze in real terms of public sector pay future increases above 1% have been welcomed; and it is thought that this has been needed to retain talent within the public domain. However, this will be an additional cost pressure for local authorities that will require financing.

The national employers, who negotiate pay on behalf of 350 local authorities, suggested that most employees with salaries over £19,430 should receive a 2% increase for 2018-19 and a further 2% for 2019-20. Lower salaried workers will receive higher increases based on hourly pay; from £7.78 to £9.00 in April 2019 and increase equivalent to 15.65%. National employers have said this would add another 5.6% to the national pay bill over the two years to 2020.

Accounting, auditing and governance

IFRS 15 – revenue from contracts with customers

The new revenue standard, IFRS 15, creates a single source of revenue requirements for all entities in all industries and is a significant departure from legacy IFRS. The new standard applies to revenue from contracts with customers and replaces all of the legacy revenue standards and interpretations in IFRS, including IAS 11 Construction Contracts and IAS 18 Revenue.

IFRS 15 is principles-based but provides more application guidance and increased judgement. IFRS 15 also specifies the accounting treatment for certain items not typically thought of as revenue, such as certain costs associated with obtaining and fulfilling a contract and the sale of certain non-financial assets. The new standard will have little effect on some entities, but will require significant changes for others.

The standard describes the principles an entity must apply to measure and recognise revenue. The core principle is that an entity will recognise revenue at an amount that reflects the consideration to which the entity expects to be entitled in exchange for transferring goods or services.

The principles in IFRS 15 are applied using the following five steps:

1. Identify the contract(s) with a customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognise revenue when (or as) the entity satisfies a performance

Entities will need to exercise judgement when considering the terms of the contract(s) and all of the facts and circumstances, including implied contract terms. Entities will also have to apply the requirements of the standard consistently to contracts with similar characteristics and in similar circumstances.

The 2018/19 Code of practice on Local Authority Accounting in the United Kingdom (the Code) will determine how IFRS 15 revenue from customers with contracts will be adopted by local government bodies. The 2018/19 Code will apply to accounting periods starting on or after 1 April 2018 but has not yet been published. The CIPFA/LASAAC Local Authority Accounting Code

Board met on 6 June 2017 and discussed the implication of IFRS 15 on Local Government entities. The minutes of this meeting corroborate our view that for most entities income streams from contracts with customers are likely to be immaterial. The vast majority of income streams are taxation or grant based which do not fall within the scope of IFRS 15 as they are not contractually based revenue from customers.

However, this may not always be the case for some smaller English authorities or authorities where there is a high public interest in commercial activities. The following income streams are within the scope of IFRS 15 and will need special consideration if they are material to the users of the financial statements:

- ▶ Fees and charges for services under statutory requirements
- ▶ Sale of goods provided by the authority
- ▶ Charges for services provided by a local authority

EY – CIPFA Accounts Closedown Workshop 2017-18

EY and CIPFA Financial Advisory Network (FAN) are continuing to work in partnership to deliver a programme of accounts closedown workshops to support local government finance professionals across the country with separate events for police bodies and English, Welsh and Scottish local authorities. The workshop programme covers the key changes impacting on the production of the 2017/18 financial statements and the outcomes of the 'telling the story' changes to the Code of Practice on Local Authority Accounting in 2016/17. Looking forward there are significant changes to IFRS that will come through in the 2018/19 Code and later, so the workshops are also focused on the key risks in relation to the new Financial Instruments standard IFRS 9 and other future expected changes in the Code with potential to impact on the General Fund and the HRA. These workshops also aim to prepare local authority finance staff for a 'faster, smarter and more accurate' accounts closedown for 2017-18.

By the end of this May, your local authority will need to publish its unaudited statement of accounts and publish audited accounts by the end of July. These changes provide risks for

both the preparers and the auditors of the financial statements. Local Authorities will now have less time to prepare the financial statements and supporting working papers. As your auditor, we have a more significant peak in our audit work and a shorter period to complete the audit. Risks for auditors relate to delivery of all audits within same compressed timetable. Failure to meet a deadline at one client could potentially put delivery of others at risk.

To mitigate this risk we will require:

- ▶ Good quality draft financial statements and supporting working papers by the agreed deadline
- ▶ Appropriate staff to be available throughout the agreed audit period
- ▶ Complete and prompt responses to audit questions

If your authority is unable to meet key dates within our agreed timetable, we will notify you of the impact on the timing of your audit, which may be that we postpone your audit until later in the summer and redeploy the team to other work to meet deadlines elsewhere.

Of the 150 authorities we audit, we currently consider that around a quarter have left themselves a significant amount of work to do to get there and are running a real risk of missing the deadline because they will not have quality draft accounts and supporting evidence ready for their auditors by the end of May.

In addition to our workshops with CIPFA, we have held events in each of our local offices and gathered insights from over 100 practitioners and their local audit teams on the importance of what finance teams and auditors each need to do, and collaboratively, to achieve a successful faster closure. We have put together a comprehensive list of actions to streamline processes, work more collaboratively with their auditors and draw on EY's analytics and innovative audit approach to achieve faster close. We include a summary below.

Summary of faster close activities

Finance teams are:

- ▶ Critically appraising the content of their accounts, removing unnecessary disclosures
- ▶ Closing the ledger earlier and encouraging greater discipline across the authority to comply with deadlines for accruals
- ▶ Preparing discrete sections of the accounts (e.g., narrative report and remuneration notes) and associated working papers earlier to facilitate early audit work
- ▶ Focusing on judgements and significant estimates earlier including engagement with auditors
- ▶ Reviewing the de-minimis level for accruals, including discussion with auditors
- ▶ Conducting a hard close for monthly reconciliations e.g., bank reconciliations, feeder systems, etc., with a zero-tolerance to reconciling items over a month old
- ▶ Undertaking weekly cut-off testing in April to ensure that the accounts are complete, retaining the evidence in case that item is selected for audit testing

Auditors are:

- ▶ Meeting regularly with finance staff, sharing details of the audit approach, agreeing a planned timetable of tasks, communicating changes and providing clarity on what is expected and when

- ▶ Bringing forward testing to reduce the amount needed to do in the summer. In particular, valuation of land and building and other high risk areas
- ▶ Increasing the use of analytics to interrogate ledger and payroll transaction data
- ▶ Using the online EY client portal to streamline communications with finance teams
- ▶ Attending workshops with finance teams on accounting issues and effective working papers
- ▶ Selecting items for sample testing earlier

Together finance teams and auditors are:

- ▶ Holding regular meetings throughout the year to share progress and discuss issues
- ▶ Planning respective activities to ensure sufficient capacity on both sides
- ▶ Revisiting audit issues from the prior year, agreeing how similar issues can be avoided
- ▶ Ensuring the client assistance schedule is appropriately tailored

We have produced a faster close briefing checklist that you can use to ensure that you are doing all you can, alongside working with us, to achieve the accelerated timetable. For more information please contact your local engagement lead.

Regulation news

EU General Data Protection Regulation: are you ready?

On 17 December 2015, after more than three years of negotiations and several draft versions of the General Data Protection Regulation (GDPR), an informal agreement was reached between the European Parliament and Council of the European Union. The GDPR is a significant change for organisations. It introduces more stringent and prescriptive data protection compliance challenges, backed by fines of up to 4% of global annual revenue. The regulation replaces Directive 95/46/EC, which has been the basis of European data protection law since it was introduced in 1995.

The Regulation has a significant impact on organisations in all sectors, bringing with it both positive and negative changes in terms of cost and effort.

Key changes proposed by the EU GDPR include:

- ▶ Regulators can impose fines of up to 4% of total annual worldwide turnover or €20,000,000
- ▶ Data Protection Officers (DPOs) – DPOs must be appointed if an organisation conducts large scale systematic monitoring or processes large amounts of sensitive personal data
- ▶ Accountability – organisations must prove they are accountable by establishing a culture of monitoring data processing procedures, minimising data retention and building safeguards, and documenting data processing procedures
- ▶ Organisations must undertake Privacy Impact Assessments when conducting risky or large scale processing of personal data

- ▶ Consent to process data must be freely given, explicit and individuals must be informed of their right to withdraw their consent
- ▶ Organisations must notify supervisory authorities of data breaches 'without undue delay' or within 72 hours, unless the breach is unlikely to be a risk to individuals
- ▶ Introduction of new rights – right to be forgotten, right to data portability and right to object to profiling
- ▶ Organisations should design data protection into the development of business processes and new systems and privacy setting should be set a high level by default
- ▶ Data processors become an officially regulated entity

Whilst organisations may welcome the harmonisation of laws across the 28 EU member states which will make the complex data protection landscape easier to navigate, the introductions of new rights for individuals are likely to increase the regulatory burden for organisations.

Organisations need to review their current data protection compliance programmes to determine next steps and decide on the level of investment they need to make before 2018 to address the changes.

Organisations need to act now to ensure that they are ready to comply with the new Regulation when it comes into force on 25 May 2018.

Key questions for the Audit Committee

Has your local Authority considered the changes to council tax flexibilities into the 2018-19 budget And the impact of changes to business rate retention into your Medium Term Financial Strategy?

Has your local authority been affected by the collapse of Carillion plc? How have contingency plans been implemented to maintain public services? What (if any) is the local authority's financial exposure to this event?

Has your local authority included in its budget any likely increases of employee wages above 1%?

Has your Authority considered how IFRS 15 might impact your revenue streams?

How has the local authority prepared for the accelerated accounts closedown timetable for 2017-18?

Has the Authority considered the implications of the new GDPR, and is the Authority confident that it comply with its requirements when it comes into force?
